

CHOICE TRIO®

Water Conditioner

CHOICE® TRIO is a non-AMS liquid water conditioner designed to aid in the performance of herbicides susceptible to the negative effects of hard water. **CHOICE TRIO** performs via three modes of action: **sequestering, chelating, and complexing** of all hard water cations.

PRODUCT FEATURES:

- **Water Conditioner**
 -  Sequestering
 -  Synthetic Chelating
 -  Complexing
- **Non-AMS Formulation**

PRODUCT BENEFITS:

- Reduces effects of hard water on herbicide performance
- Effective on all hard water cations
- Can be used in applications where AMS is not recommended but water conditioning is required

Rates:
1-2 qts/100 gallons of spray solution (0.25-0.50% v/v)
Fill spray tank ½ full of water and begin to agitate
In harder water conditions use higher rate
When water hardness is unknown, use min of 0.5% v/v
Always add Choice Trio to the tank mix first

ALWAYS READ AND FOLLOW LABEL DIRECTIONS.

A GREAT WATER CONDITIONER IS A KEY FACTOR TO MAXIMIZING YOUR APPLICATION!

Hard water can wreak havoc on the performance of your spray solution and also be the cause of some serious messes depending on the tank mix partners and water quality.

*Infield example from the state of Florida June 2016. Results may vary depending on specific situation.
