

For growers or custom applications who want to minimize the variability in performance of strobilurin fungicides, **FRANCHISE**[®] is specially formulated for use when spraying fungicides on crops that are experiencing stress. Unlike traditional surfactants, **FRANCHISE** is specifically formulated for use with strobilurin chemistries.

FEATURES:

- Contains LECI-TECH, a unique technology that assists overall spray performance
- Can be applied by ground or air
- Liquid formulation

GROWER BENEFITS:

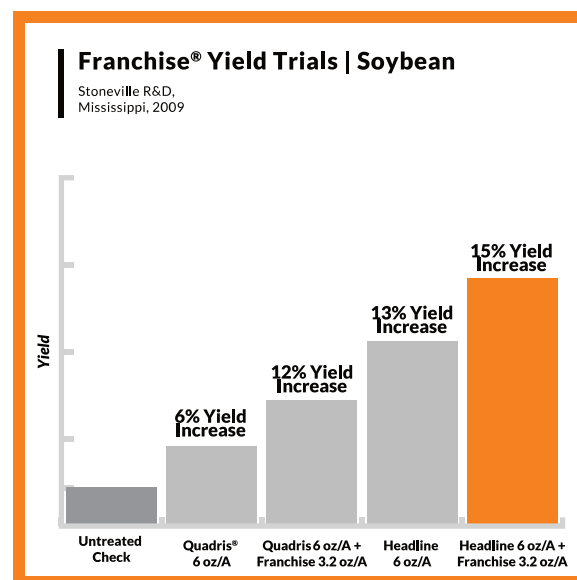

- TO: Drift reduction with performance-sized droplets
- ON: Droplet retention by adhesion and spreading
- IN: Increased penetration without cuticle disruption
- Consistently minimizes variability of strobilurin performance
- Proprietary formula is particularly helpful to plants experiencing stress

RATES:

1-2 qts/100 gals of spray mixture or 3-4 oz/A for aerial application

TARGET CHEMISTRIES:

Strobilurin Fungicides
