

GRAPE RATES REFERENCE GUIDE

Hi-Wett® Use Rate for Grapes									
Hi-Wett® / Tactic Use rate (oz/acre)									
Grapes	Pints and Lbs of formulated chemical in spray mix per acre								
	1	2	3	4	5	6	7	8	9
oz of Hi-Wett per acre									
Grape Foliage	2.5	3.5		4		5		5.5	
Grape Bunches	6.5		7.5	8		9		9.5	

Instructions: Add up the pints and pounds of formulated chemical in the spray mix on a per acre basis and find the number in the **red bar** at the top of the above chart. Use that **column** to determine the appropriate Hi-Wett rate **per acre** for the crop target you are spraying.

Ex: Grape Foliage - 2 pints per acre of a fungicide being sprayed. Use 2.5 oz per acre of Hi-Wett
 Grape Bunches - 2 pints per acre of a fungicide being sprayed. Use 6.5 oz per acre of Hi-Wett

Substitute **Hi-Wett** with **TACTIC** if rain or overhead irrigation is expected within 5 days of spraying to aid rainfastness

Use **TACTIC** at double Hi-Wett Rates

Excellent Tank Partner for Penetration Benefits of Leci-Tech

0.15% concentration of Hi-Wett on lower leaf

0.25% concentration of Hi-Wett on Chardonnay fruit
