

# Every Drop Counts!

Offering customized solutions to improve the efficiency of your irrigation system, from the wellhead to the roots.

Gets your water to the soil

Meras Engineering can help you evaluate your irrigation system and recapture the value of irrigation uniformity.

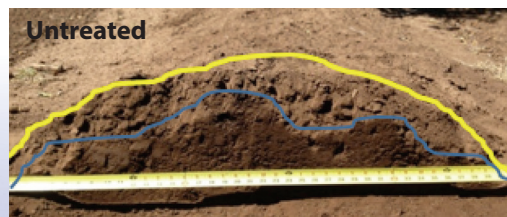

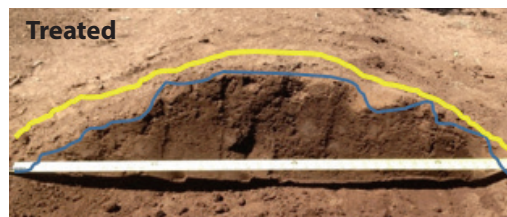

Meras Engineering offers complete solutions for wells, reservoirs, filter stations, irrigation systems, food safety, and post-harvest programs. If it involves water, we can help you engineer a solution.

Gets your water in the soil

WaterMaxx<sup>®</sup>2 maximizes water infiltration and distribution:

- Improves infiltration so that water and nutrients move into the rootzone quickly and evenly
- Improves the lateral movement of water, increasing the horizontal reach of water
- Improves the availability of water and nutrients to the plant, increasing crop productivity
- Reduces water use and makes every drop count

Contact your Nutrien Ag Solutions™ dealer today to schedule an evaluation of your irrigation system and soil conditions to design a customized program for optimizing your water utilization.
