

VADER® is a unique, proprietary adjuvant designed to aid in the delivery and deposition of insecticidal sprays. The premium formulation, including acidifying agents, helps provide a spray solution environment that protects the integrity of insecticides sensitive to high pH (alkaline) solutions.

FEATURES:

- Contains LECI-TECH, a unique technology that assists overall spray performance
- 90% active and low odor formulation

GROWER BENEFITS:

- TO: Drift reduction with performance-sized droplets
- ON: Droplet retention by adhesion and spreading
- IN: Increased penetration without cuticle disruption
- Reduces spray solution pH to prevent pesticide degradation
- Maximizes neonicotinoid insecticide performance

RATES:

1-2 qts/100 gals spray solution

TARGET CHEMISTRIES:

Insecticides

**Maximizing Insecticide Performance
