

### Radio Script

Leci-Tech chemistry is a unique technology exclusive to Loveland Products that's designed to give maximum performance through drift reduction, droplet retention & penetration.

#### **To the Plant.**

Leci-Tech chemistry suppresses drift by producing more uniform sized droplets, optimizing nozzle performance.

#### **On the Plant.**

Leci-Tech is engineered to maximize the contact area for better coverage, and give you more consistent control.

#### **In the Plant.**

Leci-Tech is formulated to ensure maximum penetration through the leaf without cuticle disruption, elevating the efficacy of both systemic and contact pesticides.

#### **To. On. In.**

Better drift management, droplet retention, and penetration in a single technology.

That's why Leci-Tech is Performance made easy.
