

METRIBUZIN 75

What does Metribuzin have to offer to growers? Let's see.....

Features:

- Outstanding value at about \$5 per acre.
- Another mode of action to help with resistant and hard to control weeds (Group 5).
- Fall and Spring applications to multiple crops.
- Help in controlling weeds that other herbicides miss, including: Marestalk, chickweed, henbit, lambsquarters, common ragweed, sunflower, velvetleaf, and pigweeds (including waterhemp)!
- Powerful residual activity!

Again, what does Metribuzin offer to growers?

A lot! Especially to the weeds below!
