

Accomplish[®]LM

Soil Applied

The Accomplish[®] line of products are innovative biochemical fertilizer catalysts designed for use with both liquid and dry fertility programs, significantly increasing fertilizer availability and improving overall plant performance.

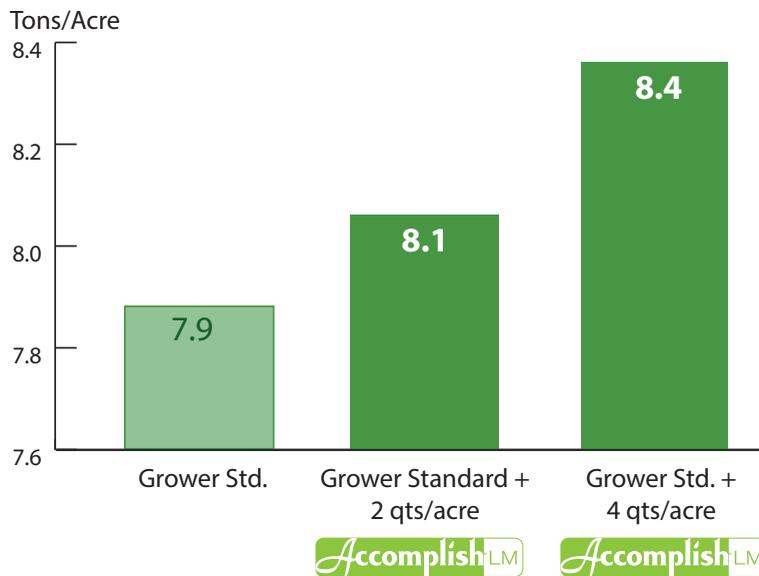

Accomplish LM is specifically formulated for use with liquid fertilizer and broadcast applications.

ACCOMPLISH LM FEATURES AND BENEFITS:

- Improves nutrient availability and uptake
- Enhances nutrient use efficiency
- Promotes better root growth and development
- Improves plant performance
- Optimizes yield potential

Alfalfa – Christmas Valley, OR (2013)

Accomplish LM applied at 2 qts and 4 qts per acre

Sum of 3 cuttings; application: 5/15/13
