

Accomplish[®]LM

Soil Applied

The Accomplish[®] line of products are innovative biochemical fertilizer catalysts designed for use with both liquid and dry fertility programs, significantly increasing fertilizer availability and improving overall plant performance.

Accomplish LM is specifically formulated for use with liquid fertilizer and broadcast applications.

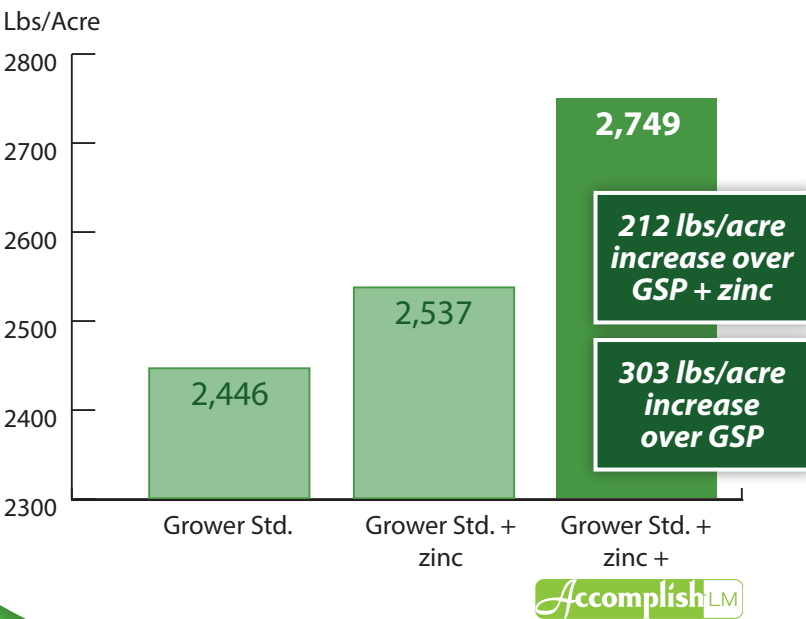

PRODUCT BENEFITS:

- Improves nutrient availability and uptake
- Enhances nutrient use efficiency
- Promotes better root growth and development
- Improves plant performance
- Improves water penetration
- Reduces salt stress
- Increases yield potential

Study Shows Higher Almond Yields with Accomplish LM

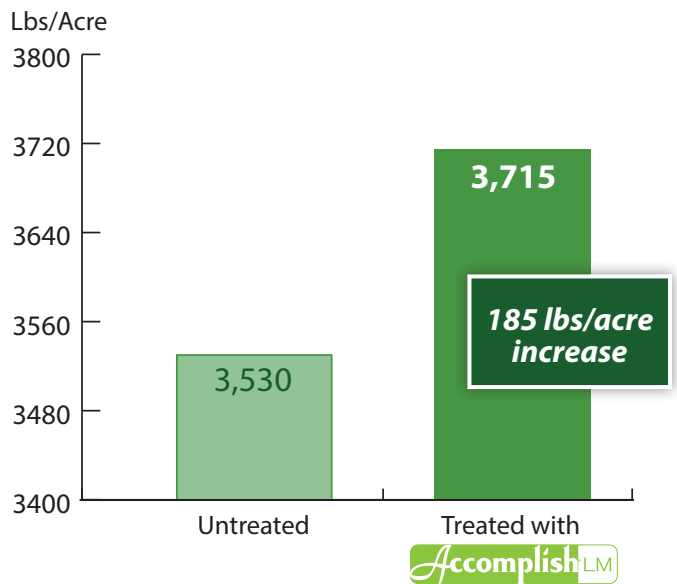

Almonds – Merced County, CA (2013)

Accomplish LM applied at 4 qts per acre
GSP = 5 tons per acre compost

Almonds – Firebaugh, CA (2010)

One treatment of Accomplish LM applied at 1 gal per acre through drip irrigation to 30 acres in April 2010

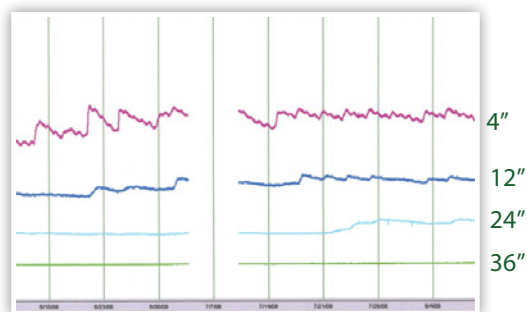

Study Shows Better Irrigation Response with Accomplish LM

Almonds – Wasco, CA (2008)

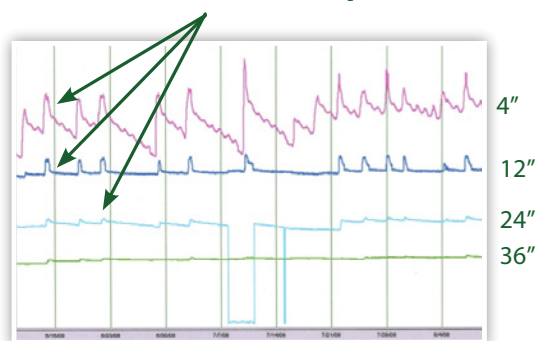

Accomplish LM applied at 1 gal per acre

Poor irrigation response

Untreated

Sharper irrigation response at 4, 12 and 24" depth

Treated with **Accomplish^{LM}**

Almond Protocols

Accomplish LM products can be applied through drip and microjet irrigation systems. They can also be blended with fertilizers in your current fertility program.

Rates

Accomplish LM should be used at the following times to maximize the benefits of the program:

Spring application	Mid-season application	Post-harvest application
<ul style="list-style-type: none"> Improved nutrient utilization Increased water penetration <p>Apply 2 to 4 quarts soon after root flush</p>	<ul style="list-style-type: none"> Maintains deep, reduced salinity root zone <p>Apply 2 to 4 quarts at bloom time</p>	<ul style="list-style-type: none"> Improved root flush Increased K uptake <p>Apply 2 to 4 quarts at post-harvest</p>
