

BLACKMAX[®] 22

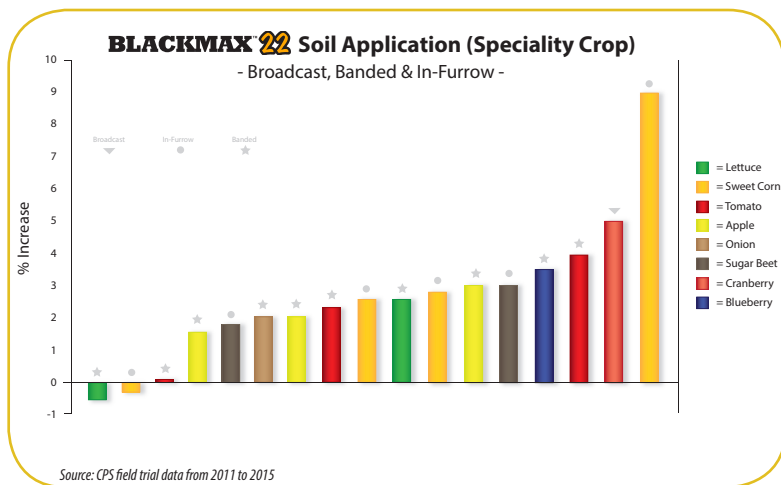

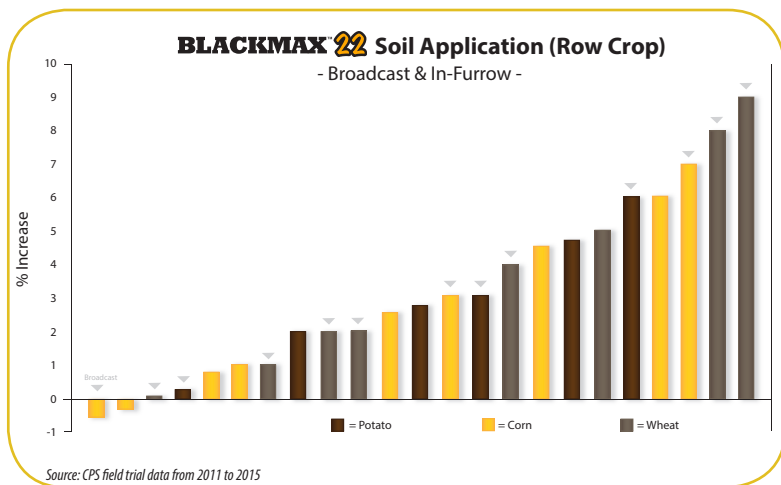

If you feed it, you need it!

Blackmax[®] 22 is a nutritional enhancement tool designed to positively impact nutrient availability and soil attributes. When combined with a grower's fertilizer program, the Linear Humus Components (LHC) in BlackMax 22 can give growers more nutrition for their crops and provide a better soil environment in which to grow. A more sustainable approach to plant nutrition.

BENEFITS

- LHC technology to enhance applied nutrient availability and uptake
- Enhanced existing nutrient mineralization and nutrient solubility
- Designed to promote beneficial microbes
- Sound, efficient, flexible formulation

Key Crops	Soil Applied Rate	Foliar Applied Rate
Cereal Grains	0.5 to 4 gal/acre in-furrow or banded	1 to 12 qts/acre per application
Legume Vegetables	0.5 to 4 qts/acre	1 to 12 qts/acre per application
Root and Tuber Vegetables	0.5 to 4 gal/acre in-furrow or banded	1 to 12 qts/acre per application
