

Circa™ Zn is from our line of concentrated liquids specifically designed for coating prilled and granular fertilizers with micronutrients. Circa micronutrients allow for accurate and reliable access to essential soil applied micronutrients to support yield and quality. Circa ZN pairs with your dry N, P or K applications for a flexible whole acre fertility solution designed around your farm's needs.

FEATURES:

- Designed to coat all types of dry fertilizers for maximum distribution across the acre
- Highly concentrated formulations deliver high levels of key nutrients
- Compatible with Titan® XC and other nutrient use efficiency tools

GROWER BENEFITS:

- Convenient and efficient way to address early season zinc needs in many crops where liquid injection isn't an option
- Distribution and efficiency is maximized by the micronutrient being coated on each piece of dry fertilizer applied

RATES

Up to 160 oz per ton of dry fertilizer

Get more from every dry fertilizer application with TITAN XC. Specifically formulated for impregnation on dry fertilizer blends, TITAN XC is the key to quick release and uptake of vital plant nutrients. The unique and concentrated biochemistry in TITAN XC provides the broadest range of activity to maximize the return on your dry fertilizer investment.

FEATURES:

- Extra concentrated formulation for superior impregnation on fertilizer prill
- Consistent performance across plant and soil types
- Compatible with a variety of dry fertilizer blends (P & K, MESZ, MES, pell lime, sulfate of potash, ammonium sulfate, gypsum)

GROWER BENEFITS:

- Expedites nutrient availability and uptake
- Enhances nutrient use efficiency
- Promotes better root growth and development
- Optimizes yield potential

RATES

16 oz per ton of dry fertilizer
