Extract

POWERED BY *Accomplish*™

EXTRACT Powered by Accomplish™ is a Loveland Products proprietary blend of proven fertilizer biocatalyst — Accomplish® LM and a nitrogen source, designed to help growers not only manage crop residue but also easily and effectively optimize the release of nutrients from residue and those in the soil.

FEATURES/ ADVANTAGES/ BENEFITS:

- Promote release of nutrients trapped in residue or bound in soil
- Extend existing nutrient availability later into the season
- Optimize plantability in the spring
- More even crop emergence
- Improve yield potential

APPLICATION RATE:

1-2 gallons/A

APPLICATION TIMING:

Apply post-harvest or at pre-emergence timing
(compatible with many herbicides)
