

Extract

POWERED BY *Accomplish*[™]

EXTRACT Powered by Accomplish[™] is a Loveland Products proprietary blend of proven fertilizer biocatalyst — Accomplish[®] LM as well as a nitrogen source, designed to help growers not only manage crop residue but also easily and effectively optimize the release of nutrients that residue and those in the soil.

FEATURES/ ADVANTAGES/ BENEFITS:

- Accelerated residue decomposition
- Maximum nutrient release from residue breakdown
- Easier plantability in the spring
- More even crop emergence
- Improve yield potential for next season's crop

USE RATES/APPLICATION TIMING:

APPLICATION RATE:

1-2 gallons per acre with a nitrogen source

APPLICATION TIMING:

Apply post-harvest or at pre-emergence timing
(compatible with many herbicides)

Straw Residue Management Trial
