

# LoKomotive®

**LOKOMOTIVE®** is specifically designed to deliver maximum potassium uptake during foliar applications, improving crop safety and increased yield potential. Using acetate technology, growers will experience higher levels of potassium absorption and increased nutrient remobilization to enhance the overall crop growth and quality.

## PRODUCT FEATURES:

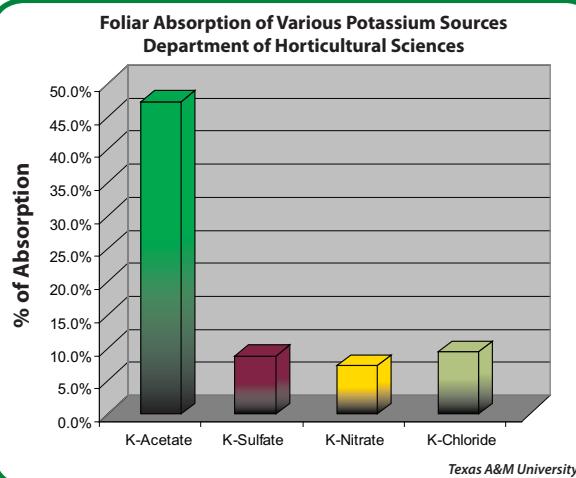

- Superior foliar uptake and translocation
- Excellent crop safety
- High analysis and absorption equals lower use rates
- Chlorine free
- Superior source of potassium (K)
- Increased nutrient remobilization
