

**MAXIMUM N-PACT B** (12-0-0 5%B w/ SRN) is an enhanced slow release nitrogen which provides a stable source of foliar nitrogen with the addition of Boron for increased uptake, translocation and utilization of nitrogen and other major nutrients at key reproductive periods, with excellent crop safety and increased stress tolerance.

#### **FEATURES:**

---

- Excellent source of foliar nitrogen with the addition of a safe foliar boron source
- Utility across many crops and application situations
- For most specialty and field crops to enhance growth and quality, support reproductive function, and help plants recover from stressful conditions

#### **GROWER BENEFITS:**

---

- Drives major nutrient translocation during reproductive stages
- Increased drought and salinity tolerance
- Supports photosynthesis during critical periods

#### **RATES:**

---

1-2 gals/A for most crops

#### **ANALYSIS:**

---
