

Malice® 2F is a 2 pound liquid imidacloprid insecticide labeled to control a wide range of pests for T&O. This systemic neonicotinoid insecticide works via contact with the pest as well as uptake through the plant's roots where it is translocated throughout the plant for consistent and effective insect control. With the residual activity of Malice 2F, applications can be made preceding the egg laying activity of many targeted pests, and low use rates allow for ease of use and various mix combinations to maximize the time spent making an application.

## FEATURES:

---

- Systemic neonicotinoid insecticide
- Residual activity
- Broad label: turfgrass, ornamentals, trees, shrubs, golf courses, parks, etc.
- Soil and foliar use
- Liquid formulation easily allows various mix combinations such as with Bisect® L (bifenthrin)
- Low use rates
- Some labeled pests include:
  - Annual bluegrass weevil
  - Billbugs
  - Black turfgrass atatenius
  - Mole crickets
  - Whiteflies
  - White Grubs
