

Awaken CoFlow™

T H E A D V A N T A G E

Requirements for Use

Retail location over-treating seed corn is a slowly growing trend, and can provide important benefits to a corn crop, but the practice is not universally endorsed and is sometimes strongly discouraged by seed companies.

It is crucial to protect the integrity of the seed for proper germination, stand establishment and seedling vigor.

These Requirements for Use are to provide guidance to CPS Retail Locations for its safe use.

Crop Safety	CPS must control crop safety liability by following these minimum practices:
Sample Retains	Always keep a retain sample of each batch of seed treated. To order sample bags, go to www.mylpistore.com and order item # LPI8246
Planting Window	Plant within 120 days of application.
CPS ONLY	Loveland and CPS will not support the use of Awaken ST on corn seed outside of authorized CPS Retail Locations.
Authorized Equipment & Proper Handling	<p>All crop seed is susceptible to damage from excess handling. Equipment must be designed to safely handle seed corn to minimize potential mechanical damage to seed germination and maintain seed integrity.</p> <ul style="list-style-type: none"> • Use only authorized treatment equipment with adequately safe seed handling. • Use a seed ladder for load-out into a seed box or seed tender to avoid seed damage from a vertical drop. • If treated seed is being transferred to a closed container such as a seed box, leave top uncovered or open for 24 hours after treatment. • Contact the CPS or Loveland Seed Treatment Managers with questions or for recommendations.
Use of talc or graphite in the planter	Awaken CoFlow is NOT intended to substitute for planter manufacturer-recommended lubricants such as talc or graphite. Planter manufacturer recommendations for seed box lubricants should be followed.
Seed Returns and Waiver of Liability	<ul style="list-style-type: none"> • CPS will NOT accept Awaken ST-treated seed returned from the grower. • If a CPS Retail Location does not have enough experience with Awaken ST on corn to locally warranty its use, a Grower Waiver of Liability should be obtained.
