Refer to label for specific crop and application use.

- Controls the following diseases and insects on wheat:
  - Early season Common Root Rot
  - Early season Fusarium Root Rot
  - Early season Powdery Mildew (suppression)
  - Early season Pythium Damping Off
  - Early season Rhizoctonia Root Rot
  - Early season Septoria Disease Complex
  - Early season Wheat Leaf Rust (suppression)
  - Flag Smut
  - Loose Smut
  - Stinking Smut
  - Early season protection of seedlings against injury by Aphids
  - Hessian Fly
  - Wireworms

- Controls the following diseases and insects on barley:
  - Barley Stripe (suppression)
  - Covered Smut
  - Early season Barley Leaf Rust (suppression)
  - Early season Common Root Rot
  - Early season Fusarium Root Rot
  - Early season Powdery Mildew (suppression)
  - Early season Pythium Damping Off
  - Early season Rhizoctonia Root Rot
  - Loose Smut
  - Early season protection of seedlings against injury by Aphids
  - Wireworms
